WORK EXPERIENCE

2026 - Present

Founder & President

Khwazon | Kabul, Afghanistan

khwazon.com

- Founded and manage Khwazon, a software studio; assign team tasks and coordinate company work.
- Handle full-stack development across front-end and back-end functionality and review software quality.
- Communicate with clients and prepare project proposals.

Dec 2025 - Present

AI Model Evaluator / AI Data Annotator

Freelance | Remote

- Evaluate and compare AI outputs across text, image, and video tasks, providing scores and feedback.
- Work with AI training platforms including Handshake AI and Mindrift.
- Perform annotation, classification, and ranking; identify hallucinations, bias, and factual inconsistencies.
- Collect and record videos under strict task guidelines.

2019 - August 2021

High School English Teacher

SPS (Sofia Private School) | Kabul, Afghanistan

- Taught English to high school students, focusing on paragraph, essay, and story writing.
- Designed lesson plans, assessments, and examination papers.
- Founded a newsletter club; trained students to produce a weekly school-printed newspaper with student and teacher interviews.
- Collaborated with school leadership to improve the curriculum.
- Met with parents to discuss each student's progress.

PROJECTS

Ongoing

Marif - AI-Supported Learning Platform

Independent Education Technology Project | Afghanistan

- Designed and developed a mobile-first learning platform for Afghan secondary-school students using official school textbooks.
- Built the React/Vite front end and Supabase services for authentication, curriculum content, storage, and learning data.
- Integrated a Gemini-powered AI tutor grounded in textbook chapters and exercises, with chat history, contextual help, and chapter maps.
- Created English, Dari, and Pashto interfaces with RTL support, textbook reading, search, quizzes, exercises, and mock-exam activities.
- Built a book-extraction and verification workflow to structure textbook content for the platform.

Additional Projects

Web, AI, and Data Projects

Project Highlights

- WASH AI Knowledge Platform - Built a Phase 1 domain-specific RAG prototype with Angular, ASP.NET Core, PDF chunking, vector retrieval, and cited answers.
- SearchPDF AI - Developed the document upload, parsing, chunking, preview, and persistence foundation using Angular, Express/TypeScript, and PostgreSQL.
- Khwazon Studio Website - Built a trilingual, RTL-ready React/TypeScript website with a guided assistant and project-brief workflow.
- KabulRide - Developed a React/Vite mobility prototype with passenger and driver flows, translations, and Leaflet-based maps.
- Khayat Tailor Management - Designed an HTML/CSS/JavaScript interface for customers, orders, measurements, clothing categories, and tenant administration.
- English Poetry Analysis - Built a Python/Streamlit app for sentiment analysis and TF-IDF similarity recommendations.
- Personal Portfolio - Built a React portfolio site to present professional experience, technical skills, and selected projects.
