PROFESSIONAL PROFILE

Information technology graduate with a concentration in Data Sciences and experience in survey design, data validation, Python analysis and Power BI reporting. Background includes field-team coordination at Harakat, data systems and content verification at Khwazon, and student-record maintenance in a school software system.

WORK EXPERIENCE

Apr 2026 - Present

Founder & President

Khwazon | Kabul, Afghanistan

Focus: data systems, information management and software development

- Coordinate development tasks and review product quality for eKhayat, a tailor-shop platform, and Marif, an education platform in testing.
- Build workflows to extract, structure and verify Marif textbook content, with links from searchable topics to source pages.
- Develop services for curriculum content, storage and learning data, with multilingual interfaces.
- Gather client requirements, translate them into system features and workflows, and prepare project proposals.

Dec 2025 - Present

AI Model Evaluator / AI Data Annotator

Freelance | Remote

- Analyze AI-generated dashboards and provide written feedback on how clearly and consistently they present information.
- Compare AI outputs across text, image and video tasks and assign evaluation scores.
- Perform annotation, classification and ranking; identify factual inconsistencies, hallucinations and bias.
- Work with AI training platforms including Handshake AI and Mindrift.

May 2024 - May 2025

Data Analyst Assistant (previously Intern)

HARAKAT | Kabul, Afghanistan

Earlier internship: May - October 2022 (six months).

- Designed and managed Kobo surveys to support education-sector data collection.
- Collected, cleaned and validated data before analysis.
- Analyzed datasets using Python to identify patterns and insights.
- Developed interactive Power BI dashboards to track education-project performance and key indicators.
- Collaborated with field teams on data collection and reporting.

2019 - August 2021

High School English Teacher

SPS (Sofia Private School) | Kabul, Afghanistan

- Maintained student records in the school's software system for weekly grading.
- Taught English and prepared lesson plans, assessments and examination papers.
- Founded a newsletter club and trained students to produce a weekly school newspaper.

PROJECTS

2026

Afghanistan Education Atlas

Data and education research dashboard | AI-assisted project

- Used Python to clean 9,952 school-location records from 26 provinces, standardize province names, check coordinates, and flag missing or conflicting values.
- Built interactive maps and province comparisons using survey indicators covering 34 provinces, with downloadable data and documented sources and methods.

afghanistan-education-atlas.vercel.app

In testing

Marif - AI-Supported Learning Platform

Khwazon Product | Afghanistan

- Built a workflow to extract, structure and verify textbook content for a multilingual learning platform.
- Structured Dari and Pashto curriculum content, including 328 Grade 12 chapters across 2,207 pages.
- Indexed 2,352 topics for search, with links to source pages.
- Developed React/Vite interfaces and database-backed services for authentication, curriculum content, storage and learning data.

EDUCATION

2018 - 2024

Bachelor of Information Technology

Concentration in Data Sciences

American University of Afghanistan (AUAF)

Oct 2024 - Nov 2024

AI and Data Science Training

HBC Digital Camp, Kabul | Sponsored by UNDP

Dec 2017

Higher Secondary School (FSC)

Rahman Baba High School, Kabul

SKILLS & TECHNOLOGIES

Core capabilities	Data collection, validation, reporting, field-team coordination and information management.
Collection & reporting	Kobo / ODK, Power BI, Excel, MS Office.
Analysis	Python, Pandas, NumPy, Matplotlib, SQL.
Databases	PostgreSQL, MySQL, SQLite.
Development	React, JavaScript, TypeScript, Node.js, API integration and multilingual interfaces.

PERSONAL SKILLS

Linguistic skills	Pashto: native. English, Dari and Urdu: fluent in speaking and writing.
